

# 2011 Gordon Research Conference

## Chemical and Biological Terrorism Defense

March 20<sup>th</sup> - 25<sup>th</sup>, 2011  
Ventura, CA

### *Basic Research as the Foundation for Future Countermeasure Development*

This conference will reflect the multi-disciplinary nature of chemical and biological terrorism defense and will focus on chemical agents and bioterrorism-related pathogens that impact humans, plants, and / or animals.

Major topic areas include: synthetic biology and biodefense, chemical defense research, host-pathogen interaction, immune suppression and evasion, toxins and basic mechanisms of action, agents of agricultural bioterrorism, and translational research for the development of novel therapeutic strategies.

Application Deadline: February 27<sup>th</sup>, 2011
